Professional Summary

- Full Stack Developer with 1.5 years of experience building enterprise web applications using React.js, Next.js, JavaScript, Node.js, Express.js, and MySQL.
- Experienced in developing responsive user interfaces, scalable admin dashboards, RESTful APIs, and production-ready client applications.
- Proficient in Redux Toolkit, Context API, Tailwind CSS, Axios, reusable component architecture, API integration, and Agile team collaboration using Git workflows.

Professional Experience

Full Stack Developer

Mannschaft Infotech

Jun 2025 – Present

Nellore, Andhra Pradesh

- Developed enterprise web applications using React.js, Next.js, JavaScript, Node.js, Express.js, and MySQL.
- Built responsive business websites, admin dashboards, and client portals using reusable React components and Tailwind CSS.
- Developed and integrated RESTful APIs for dynamic data management and seamless frontend-backend communication.
- Designed and optimized MySQL database schemas and implemented CRUD operations for business applications.
- Implemented Redux Toolkit and Context API for centralized state management and scalable application architecture.
- Optimized application performance using lazy loading, code splitting, and efficient API handling.
- Collaborated with UI/UX designers, backend developers, and QA engineers in an Agile/Scrum environment using Git, feature branching, pull requests, and code reviews.

Key Projects

Enterprise Corporate Website & Career Management System (Client Project)

React.js, JavaScript, Node.js, Express.js, MySQL, React Router, Framer Motion

- Developed a full-stack enterprise corporate website with 30+ responsive pages using React.js and JavaScript.
- Built a Career Management System enabling job postings, online applications, and applicant tracking.
- Designed and developed an Admin Panel for managing job listings, candidate applications, and website content.
- Developed RESTful APIs using Node.js, Express.js, and MySQL to support CRUD operations and dynamic content management.
- Implemented reusable React components, responsive layouts, animations with Framer Motion, and client-side routing using React Router.
- Collaborated with frontend and backend developers using Git, feature branches, pull requests, and Agile development practices.

Enterprise Admin Dashboard (Client Project)

React.js, TypeScript, Redux Toolkit, Tailwind CSS, Axios, React Router

- Developed a scalable enterprise admin dashboard with Shop, Orders, Payments, Fitness, Diet, Franchise, CMS, Reports, and User Management modules.
- Integrated REST APIs using Axios for real-time data management, CRUD operations, and dynamic dashboard updates.
- Implemented Redux Toolkit and Context API for centralized state management across multiple application modules.

- Built reusable UI components including tables, forms, filters, pagination, modals, dashboards, and data visualization screens.
- Designed fully responsive interfaces using Tailwind CSS for desktop, tablet, and mobile devices.
- Improved application performance using React. Lazy, code splitting, and component optimization techniques.

Fitness & Wellness Platform (Client Project)

React.js, JavaScript, React Router, Context API, Tailwind CSS, Axios

- Developed responsive frontend modules for Classes, Trainers, Institutes, Subscription Plans, User Dashboard, and Booking features.
- Integrated REST APIs using Axios to fetch and display dynamic application data.
- Implemented Context API for global state management and reusable component architecture.
- Built responsive, mobile-first user interfaces using Tailwind CSS and React Router for seamless navigation.
- Implemented lazy loading and code splitting to improve page load performance and user experience.
- Collaborated with designers, backend developers, and QA engineers in an Agile development environment.

OTT Platform (Client Project)

React.js, JavaScript, Context API, Tailwind CSS

- Developed responsive user interfaces for Radio, Music, Podcasts, WebTV, and content discovery modules.
- Integrated API-driven dynamic content using reusable React components and Context API.
- Designed responsive layouts optimized for desktop, tablet, and mobile devices to improve user experience.
- Built modular and reusable UI components following scalable frontend architecture and best practices.
- Optimized rendering performance and application responsiveness through efficient component design.
- Collaborated with cross-functional teams using Git workflow's, pull requests, and code reviews in an Agile environment.

Technical Skills

Frontend: React.js, Next.js, Tailwind CSS, React Router
Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3
State Management: Redux Toolkit, Context API
Backend: Node.js, Express.js
Database: MySQL, MongoDB, Firebase
API & Networking: REST APIs, Axios, Postman
Developer Tools: Git, GitHub, VS Code
Cloud & Deployment: AWS, Render, Vercel
Core Concepts: Responsive Design, Reusable Components, Component Architecture, API Integration, CRUD Operations, Performance Optimization, Lazy Loading, Code Splitting

Achievements

- Developed **30+ responsive webpages** for enterprise applications.
- Built **4 production client projects** from design to deployment.
- Developed **50+ reusable React components**.
- Integrated **40+ REST APIs** across multiple business applications.

Education

PBR Visvodaya Institute of Technology & Science (JNTUA) 2020 – 2022
Master of Computer Applications (MCA)

Professional Training & Certification

NxtWave – CCBP 4.0 Intensive (Full Stack Development) 2022 – 2024
Certification: CCBP 4.0 Intensive – Full Stack Development
